Quick guide for how to set up
# CML 5Es as your new framework

1. **Identify the Need** for a new business change framework and discuss its importance with the team.

2. **Gather Information** about the current business processes, existing projects and any potential changes that need to be made in order to support the new framework.

3. **Develop a Plan:** Develop a plan outlining the steps to successfully implement the new business change framework.

4. **Communicate the Plan:** Communicate the plan to the team, outlining the timeline, goals, and any potential risks or challenges associated with the new framework.

5. **Train the Team:** Train the team on the new framework and provide resources to ensure a successful implementation.

6. **Implement the Framework:** Implement the new business change framework and monitor progress.

7. **Evaluate the Results:** Evaluate the results of the new framework and adjust as needed.

A methodology that gets you results for leading people through change
